

**A ROCHA
LEBANON**
—
**September
2023**

September is synonym with:

Drought

In Lebanon, global warming means first fast snow melting. The consequence is that mountains do not play their role of water tower for the Bekaa valley as before.

**Hamzeh saving hundred of fish
from the habitat pond in Mekse...**

... before its deepening

Aamiq, summer 2022

Aamiq, summer 2023

In Aamiq wetlands where A Rocha Lebanon brought back the water in the 2000', the drought is there again.

September also means:

Harvest

Harvest (1) Honey

A Rocha Lebanon manages with Action Research Associates the educational apiary in Beirut...

... and September was the time of the harvest

Harvest (2) Seeds

It is time to harvest and store seeds
for a green and flourishing spring

Harvest (3) Know-how in building with earth

It is now time to apply what was learned in the July's workshop,
and to take benefit of it

... with the building of a
chicken coop and a dovecot

Harvest (4) Know-how in waving palm

Last round of the training on waving palm: the art of sewing,
and production of our first hats

First productions by the Mekse team

Miscellaneous

The fountain of fragrances

Bambou and reed wind cuts to create microclimate

Progress of the pine forest

April 2021

September 2023

**The pine forest was suffering of wet soil in winter and dry soil in summer.
The digging of trenches and the end of the plowing helped to balance the humidity of the soil**

When industrial projects develop next door, planting a forest can give the impression of vanity. However...

See you next month...
